

PRODUCTS SEARCH WEB APP PROPOSAL

Project: China Import Sourcing Platform (MVP)

Prepared for: *Majed*

Prepared by: Team *Safi X Code*

Date: 2/3/2026

1 Project Overview

We propose to build a **trusted intermediary platform** that helps clients source products from China quickly, transparently, and professionally.

The platform will allow users to:

- Search products using images or links
- Receive a negotiated price quote within **24 hours**
- Customize products (branding, quality, packaging)
- Book **live video calls** with markets or factories
- Subscribe to paid plans to filter serious buyers

This project will be delivered as a **Minimum Viable Product (MVP)** focused on speed, trust, and scalability.

2 Project Goals

- Launch a professional platform quickly
- Filter serious buyers using subscriptions
- Build trust through transparency and live interaction
- Keep operating costs low at the early stage
- Ensure the system is scalable for future upgrades

3 Website Features & Pages

3.1. Homepage

- Clear value proposition (10-second understanding)
- Strong headline and trust messaging
- Main actions:
 - Search for a product
 - Upload an image
 - Paste a product link
 - Book a video call
- Mobile-friendly and SEO optimized

3.2. Find Your Product Page (Core Feature)

- Secure user login required
- Product request form:
 - Product image upload
 - Product link (Alibaba / 1688 / Amazon, etc.)
 - Description
 - Required quantity
 - Shipping country
 - Custom notes (brand, packaging, quality)
- Automatic confirmation after submission
- Admin receives request instantly

Price quote delivered within 24 hours

3.3. Subscription System

Paid plans to filter serious inquiries:

Basic Plan

- Product sourcing requests
- Quote within 24 hours
- WhatsApp support

Advanced Plan

- All Basic features
- Branding & customization
- Quality checks
- Product photography

VIP Plan

- Live video calls with markets/factories
- Remote market visits
- Priority response

Monthly billing

Secure online payments

3.4. Video Call Booking Page

- Choose:
 - Market (Yiwu, Guangzhou, Shenzhen)
 - Factory visit
 - Available time slots
- Payment before booking
- Video call via:
 - Zoom / Google Meet / WhatsApp
- Automatic confirmation email

3.5. How Do We Work? Page

Simple step-by-step explanation:

1. Send photo or link
2. Research & negotiation
3. Receive price within 24 hours
4. Approve or modify
5. Production & shipping start

3.6. Trust & Transparency Page

- Why choose us
- Real China market photos
- Experience explanation
- Customer testimonials
- Human-centered service message

3.7. Admin Dashboard (Internal)

Secure admin panel to:

- View and manage product requests
- Update request status
- Manage subscriptions
- Manage video bookings
- Upload quotes and notes
- View users and activity

4 Technology Stack

Frontend & Backend

- **Next.js 16 (Full-Stack)**
- TypeScript
- App Router (modern architecture)

Authentication

- **Clerk Authentication**
- Secure login/signup
- Role-based access (Admin / User)

Database

- **PostgreSQL**
- Prisma ORM (type-safe & scalable)

Payments

- Stripe (Subscriptions & One-time payments)

File Uploads

- Product images & documents
- Secure cloud storage

Emails & Notifications

- Transactional emails:
 - Request confirmation
 - Payment confirmation
 - Booking confirmation

5 API & System Architecture

The system will include secure internal APIs for:

- Product requests
- Subscription validation
- Video booking
- Admin management
- Payment webhooks

Architecture is designed for:

- High performance
- Easy future expansion
- AI integration later (optional)

6 Hosting & Infrastructure

Hosting Setup

Service	Provider
Frontend & Backend	Vercel
Database	Neon (PostgreSQL)
File Storage	Cloud Storage
Payments	Stripe
Authentication	Clerk

Security

- HTTPS (SSL)
- Secure API routes
- Encrypted authentication
- Payment webhook validation

7 Hosting & Service Costs (Monthly)

Service	Estimated Cost
Domain Name: https://www.namecheap.com/domains/	Base on type
Vercel Hosting: https://vercel.com/pricing	Free + Cost base on Usage
PostgreSQL (Neon): https://neon.com/pricing	Free + Cost base on Usage
Clerk Auth: https://clerk.com/pricing	Free + Cost base on Usage
Mail Trap: https://mailtrap.io/pricing/?tab=email-api	Free + Cost base on Usage
Estimated Monthly Total	Base on Usages

8 Development Cost (One-Time)

MVP Development Pricing

Task	Cost
UI/UX Design	\$100
Frontend Development	\$200
Backend & APIs	\$200
Auth & Payments Integration	\$200
Admin Dashboard	\$200
Testing & Deployment	\$250
Total Development Cost	\$1150

9 Development Timeline

Phase	Duration
Planning & Design	1 Week
Core Development	3 Weeks
Payments & Dashboard	1 Week
Testing & Launch	1 Week
Total Duration	5–6 Weeks

Future Enhancements (Optional – Phase 2)

- AI product description
- Supplier CRM
- Automated quotation
- Arabic / Chinese full localization
- Mobile app
- Order tracking system

Final Summary

This proposal delivers:

- **A fast, scalable MVP**
- Low hosting costs
- High trust & transparency
- Subscription-based revenue model
- Future-ready architecture

The platform will launch quickly, validate demand, and scale safely.
